

Space, sound and access

Walk the room with the venue lead before confirming the layout.

Keep exits clear and separate moving dancers from seating, food queues and cables.

Ask about floor condition, capacity, sound restrictions, power and equipment setup.

Make seating and an accessible viewing area part of the plan. Offer a quieter space if available.

Dance area / seating / accessible route

Power and cable plan / sound limit

Water station / rest space

Weather alternative / decision deadline
